

### **accounting for investments equities pdf**

In accounting, equity (or owner's equity) is the difference between the value of the assets and the value of the liabilities of something owned. It is governed by the following equation:  $\text{Equity} = \text{Assets} - \text{Liabilities}$ . For example, if someone owns a car worth \$15,000 (an asset), but owes \$5,000 on a loan against that car (a liability), the car represents \$10,000 of equity.
