Technical Reports | Department of Computer Science

In IT security, offensive problems are technical - but most defensive problems are political and organisational. Attackers have the luxury to focus only on the technical aspects of their work, while defenders have to navigate complex political and regulatory environments.

Mobile telephony is the provision of telephone services to phones which may move around freely rather than stay fixed in one location. Mobile phones connect to a terrestrial cellular network of base stations (), whereas satellite phones connect to orbiting satellites.Both networks are interconnected to the public switched telephone network to allow any phone in the world to be dialed.
