What Electrical and Electronics Engineers Do. Electrical engineers design, develop, test, and supervise the manufacturing of electrical equipment, such as electric motors, radar and navigation systems, communications systems, and power generation equipment.

In the previous topic, Electrical Design Philosophy for Major Types of Buildings, We talk about the different types of buildings and how the building type (function) influence its electrical design. This was very clear in our previous discussions for the electrical design requirements of the industrial buildings which were included in the following topics:

Electrical wiring is an electrical installation of cabling and associated devices such as switches, distribution boards, sockets and light fittings in a structure.. Wiring is subject to safety standards for design and installation. Allowable wire and cable types and sizes are specified according to the circuit operating voltage

and electric current capability, with further restrictions on the ...

The Institute of Electrical and Electronics Engineers (IEEE) is a professional association with its corporate office in New York City and its operations center in Piscataway, New Jersey. It was formed in 1963 from the amalgamation of the American Institute of Electrical Engineers and the Institute of Radio Engineers.. Today, the organization's scope of interest has expanded into so many related ...

Castline Systems have developed a version of FormFill to run on a range of Android devices including Smartphones and Tablets. FormFill Android is available free of charge for users of FormFill Level 2 and higher. FormFill Android includes the Minor Electrical Installation Works and Electrical Installation certificates as well as the Electrical Installation Condition Report.
