In computer science and in the part of artificial intelligence that deals with algorithms ("algorithmics"), problem solving includes techniques of algorithms, heuristics and root cause analysis. In these disciplines, problem solving is part of a larger process that encompasses problem determination, de-duplication, analysis, diagnosis, repair, and other steps.

Problems and Problem Solving. What is a problem? In common language, a problem is an unpleasant situation, a difficulty. But in education the first definition in Webster's Dictionary "a question raised for inquiry, consideration, or solution" is a common meaning.. More generally in education, it can be useful to define problem broadly "as any situation, in any area of life, where ...

- Problem solving is vital in all aspects of business from people problems to technical problems and from short-term to long-term problems. And problem-solving involves two completely different, possibly conflicting thought processes: creativity and decision making. The first part, the creativity, is to generate options, possible solutions, and then the second part, the decision making is to ...
