Biofeedback is the process of gaining greater awareness of many physiological functions primarily using instruments that provide information on the activity of those same systems, with a goal of being able to manipulate them at will. Some of the processes that can be controlled include brainwaves, muscle tone, skin

conductance, heart rate and pain perception.

Quotes. What information consumes is rather obvious: it consumes the attention of its recipients. Hence a wealth of information creates a poverty of attention, and a need to allocate that attention efficiently among the overabundance of information sources that might consume it.

### **Creativity, Thinking Skills, Critical Thinking, Problem**

This handbook explores the different roles of ethics and compliance practitioners in promoting ethical conduct in organisations, and analyses benefits and drawbacks of the two approaches to understand whether it is more effective for organisations to have two separate functions dealing with ethics and compliance respectively.
